

Crystal, MN McDonalds

Major Remodel

Project Summary:

This project profile is of a major remodel of the existing Crystal, MN McDonald's quick serve restaurant. The upgraded exterior finishes consisted of FFS's Brickwal exterior panels with architectural metal accents at the Play Place and new aluminum canopies.

Meet or Exceeding Owners Goals, Values and/or Expectations:

FBS worked closely with the overall project general contractor. Providing a furnished and installed package of updated exterior finishes complete with metal accents. All finishes were coordinated and installed during hours of operation so that the restaurant would continue serving customers throughout the remodeling process. FBS worked with the GC upfront prior to mobilization making sure all dimensions were precise for accurate factory pre-manufacturing of finish veneer panels resulting in uneventful field execution.

Client Profile:

Working directly with the Midwest Division of McDonald's Corporation, FBS provided this complete shell major remodeling package with finishes.
