

Webster Springs, WV GoMart

New Construction

Project Summary:

FBS provided this complete furnish and install building package for GoMart. They are a repeat business client with a long standing relationship with FBS, which started back in 2006. This concept is located predominately in West Virginia and the surrounding area.

Meet or Exceeding Owners Goals, Values and/or Expectations:

GoMart uses FBS building packages due to the ease of doing business. Fullerton delivers the same high quality building package to each site, reduces the construction timeline and the FBS factory technician works with the selected general contractor to ensure the projects go as smoothly as possible on-site.

Client Profile:

FBS provided this complete package with the Hardi-panel exterior finish applied in the FBS manufacturing plant. GoMart operates over 100 gas/gas convenience stores in West Virginia and the nearby areas and can trace its history back to 1914. When self-service gas pumps were legalized in West Virginia, GoMart built the first one in the state which was located in Shinnston, WV.
