

Bismarck, ND Holiday Stationstore

New Construction

Project Summary:

FBS provided this panelized package to Bismarck, ND in the midst of the oil boom. Included in the FBS scope of work were the exterior walls for store and attached carwash, steel columns, roof trusses and IJoist, framing for the awning and bay window roofs along with the factory applied exterior finishes – Brickwal and EIFS. FBS supplying the install was a huge benefit to our client due to the labor shortage and the limited amount of resources (hotel rooms, materials, etc....).

Meet or Exceeding Owners Goals, Values and/or Expectations:

FBS partnered with our client and the architect to select the exterior finishes required to meet their design requirements. Fullerton also supplied columns covers for fueling area canopy which also reduced the trades on the jobsite.

Client Profile:

Holiday Stationstores has a presence in the Upper Midwest and they are adding locations in North Dakota to meet the demands in that area.
