

# Albert Lea, MN HyVee Gas New Construction

### Project Summary:

FBS provided this complete furnish and install building package for HyVee. They are a repeat business client with a long standing relationship with FBS. This project was completed in Albert Lea, MN and is home to a HyVee Gas / Caribou Coffee. This project started in January 2014, during the frigid Minnesota winter and the building shell was up in 3 days. The exterior finish had Brickwal from FFS in Endicott Red Blend, Medium 77 and Ivory. Dryvit was also used in Light and Dark Senergy. This was a scrape/rebuild of an existing store so they wanted to get the new location up and running as soon as possible.

### Meet or Exceeding Owners Goals, Values and/or Expectations:

FBS works ahead on the permit plans in conjunction with HyVee architects to speed the process along with the city. The finished product went together seamlessly and FBS was completed on-site in 3 days. The timeline was a huge benefit during the cold winter months. The FFS Brickwal exterior finish was installed in the FBS manufacturing facility so HyVee Construction did not have to worry about tenting/heating on-site.

### Client Profile:

HyVee is a fast-growing grocery chain across the Midwest and they have been adding the HyVee Gas Convenience stores to their outlots. Our design department works with HyVee on design changes to the building, changes due to city requirements and developing different prototypes.

### Client:

HyVee Construction  
Des Moines, IA
