

New Haven, CT Popeyes

New Construction

Project Summary:

This project was completed in New Haven, CT with R. Reese Construction, LLC. Fullerton's scope included the exterior wall panels, interior walls and roof truss system. The base building exterior finish was EIFS that was color matched to the requested Popeye's Color and Exotic Red for the sill. The stone wainscot was Coronado- "Cascade Mountain LedgeStone" – Four River. R. Reese Construction, LLC has utilized several Fullerton packages and his crew has been certified to set Fullerton packages, which they did on this store. The actual building assembly was 4 days.

Meet or Exceeding Owners Goals, Values and/or Expectations:

R. Reese Construction LLC, the GC, likes the ease of working with FBS. We quote the FBS package, work with him on the development of plans and deliver the building package on schedule. R. Reese Construction, LLC likes the "one stop shop" where he doesn't have to worry about several different subs on his job site. On this particular project, the city required a 3rd party inspection done on the EIFS System. Fullerton's package was inspected and we forwarded the necessary paperwork from the inspector to R. Reese Construction, LLC.

Client Profile:

Bob Reese Construction, LLC has good working knowledge of construction processes on the East Coast and has done multiple packages. We have worked with Bob Reese Construction and his crew to make the FBS construction process safe, easy and fast.
