

Valentine, NE Pizza Hut

New Construction

Project Summary:

This project was completed in Valentine, NE with CEC Eiserer Construction, LLC. Fullerton's scope included the exterior wall panels, interior wall panels, ceiling panels for certain areas, roof truss system. They utilized several different exterior finishes on this building. EIFS was done in Amber Waves, Pearl Harbor and Iron Mountain. The EIFS on this building has a 10 year warranty. The thin brick was Autumn Sands Heritage and was used on various areas of the base building. The stone wainscot was Coronado Cultured Stone- "Antique Cream" – Quik Stack and the Hardi Plank Siding was in Pearl Harbor. The building size was approximately 29x84. They chose to go with the FBS assembly option and it took approximately 6 days due to most of the siding being applied in the field.

Meet or Exceeding Owners Goals, Values and/or Expectations:

CEC Eiserer Construction liked the "one stop shop" where he didn't have to worry about several different subs on his job site and he could be working on this project in Valentine, NE and another project in Missouri.

Client Profile:

Eiserer Construction is a full service general contracting firm. What began as a small remodeling company has developed into the construction of new restaurants and custom homes across the State of Missouri. As of 2011, a second company was developed to conduct business on the West Coast with new builds for Pizza Hut in the San Diego area.
